Summary

Software Engineering student focused on full-stack web development with React, Node.js, and MERN stack. Skilled in building clean, component-based UIs and backend APIs. Strong interest in artificial intelligence applications.

Projects

React Router SPA

Developed a single-page React application with multiple routes, clean layout, and responsive design.

Node.js REST API

Built RESTful endpoints using Express with async handlers and MongoDB integration.

MERN Stack App

Created a full-stack demo app using MongoDB, Express, React, and Node.js for CRUD operations.

Skills

JavaScript (ES6+), React, React Router, Node.js, Express, MongoDB, C#, Java, SQL, Linux, Git/GitHub, HTML, CSS

Education

Centennial College – Software Engineering Technology (Artificial Intelligence), Advanced Diploma

Expected Graduation: Dec 2026
